

The need for the working class of India to put forward its own program for the benefit of the people of our country

- **Presentation by Kamgar Ekta Committee
17th April 2022**

The program on which our country and the world is run today

GLOBALISATION

**LIBERALIZATION,
PRIVATISATION**

- Globalisation through liberalisation and privatisation
- Turning every crisis into opportunity of increasing capitalists' wealth
- Domination of the monopoly capitalists over the workers of one's own country and the whole world

Program of concentrating wealth in the hands of billionaires

- In short, this program is of **concentrating wealth in the hands of billionaires** by **maximizing exploitation** and reducing rights that **working people** have won
- Program of the ruling class, headed by the few monopoly billionaires.

Managers of the capitalist class

Two sides of the Same Coin

This program has been **implemented** irrespective of **whichever party has come to power** - the BJP or the Congress

Historic All India general strike - 28th & 29th March 2022

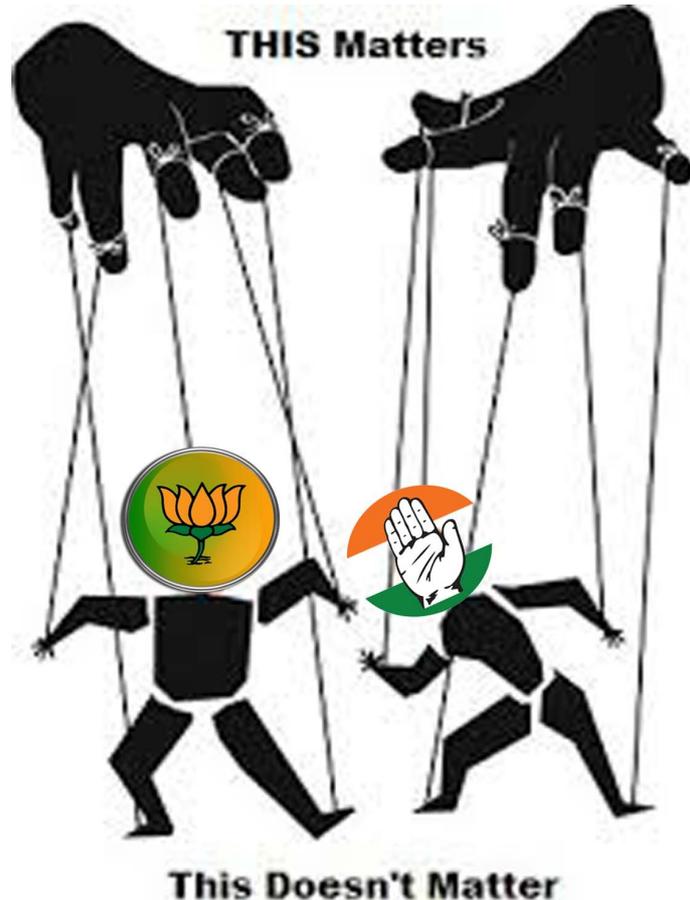

Historic All India general strike - 28th & 29th March 2022

- The Charters of Demands in all these strikes if implemented would make life better for crores of our people.
- They are **not implemented because** those would go **against the program of the ruling class**

The ruling and opposition parties have the same masters

- Make the fight against privatisation a 'political' struggle
- Politics has to do with the question of power
- **It is not a party, but the capitalist class headed by a few multi-billionaires that rule**
- The ruling and opposition parties have the same masters

Time and again they interchange their roles

- The ruling party implements the program of the billionaire class
- The opposition creates tamasha in parliament and fool the people.
- The ruling party also contributes in trying to fool the people.

Undeclared program of the monopoly capitalists

- The program on the basis of which our country is run today
- **The program of ruling class, headed by a few multi-billionaires**
- The bourgeois parties fool people with words
- The bourgeois parties implement the agenda of the ruling class
- Program of the capitalist class and the working class can never be the same

**Workers and toilers have to develop their own
program !**

Working class has to fight for political power

We have to fight for political power

Only then we will be able to actually implement this program!

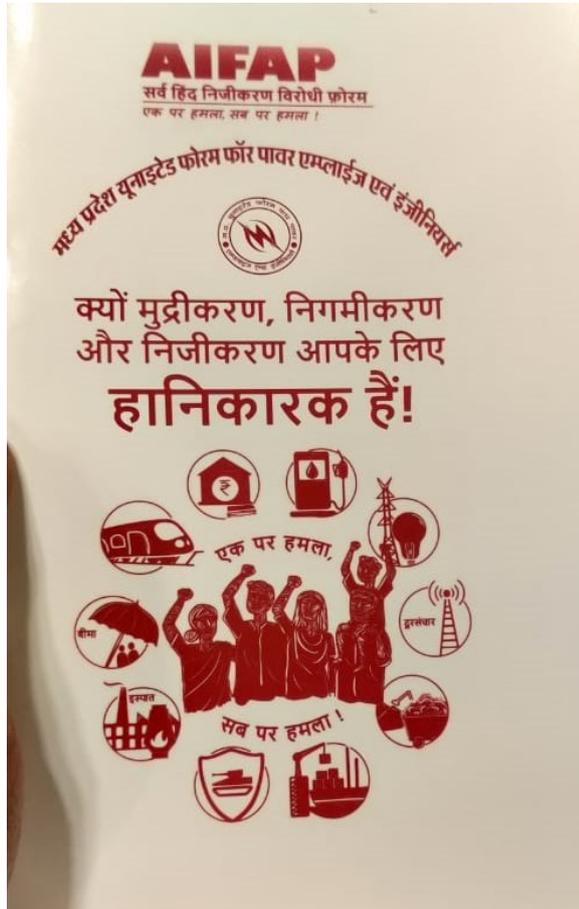

Organized workers must recognize their own strength

Recently **electricity workers** in state after state, and **goods train drivers** in Mumbai have shown that they have the **power to make government bend!**

Congratulations AIFAP!

Fight is strengthened when organized workers unite

- Demands pertaining to contract workers, minimum wages, and so on, have been taken up repeatedly
- Great importance for the youth of our country who are being increasingly pushed towards
 - joblessness
 - contract
 - clock hour work
 - no job security or any benefit

Development of worker-peasant unity

- Workers' unions and people's organizations supported the kisan andolan.
- **Kisans raised a demand about the withdrawal of the Electricity Amendment Bill 2021**

- Other demands - guaranteed MSP and procurement of all produce at MSP – demands that would lead to the strengthening of PDS

An Attack on One is an attack on All!

- The sure way of strengthening our unity across sectors
- We must demonstrate our unity whenever our people are attacked on the basis of religion, caste, region, etc.

We have the potential to counter the bourgeoisie's program!

- The labour of the working class and other working sections is essential for society
- The capitalist class is a parasite

We have the strength of numbers!

- The task before us is to unite irrespective of affiliations
- Task is to recognise and involve marginalised sections like women and youth
- If we encourage women, youth and our members to release their initiative, our strength will multiply

Another system is possible!

We are not living in medieval times

- when food was scarce,
- the cures of diseases was unknown,
- when people had to live in darkness

There is no dearth of food in the world and yet people starve!

The educated and organized working class has to come together and fight!

- **We and only we have the potential to do so**
- Those who struggle for two meals a day do not have time, education or energy to ensure that everyone has a life befitting a person of the 21st century

The challenge is great, but these challenges can be successfully tackled!

**Let us all come together and develop the
program of the working class!**

**Let us work to build the unity of working people
around this program**

**Let us prepare conditions so that we the working
people will be rulers of society**

Let us ensure prosperity and security for all toilers!
